# JP LONG statement

Working with blown glass and steel, JP Long's work captures a feeling of sumptuous matter in motion. Influenced by modernist geometry, Long's work evokes organic imageries that reference naturally occurring events, such as energy, force and magnetism. His sculpture, based on refined aesthetics, studied discipline, and meticulous skill, is owed to formal training in jewelry and metal art at CCA, as well as apprenticeships with prominent San Francisco Bay Area sculptors. Long's work is intimate, playful, and beautiful. His sculpture studies shape, volume and pressure, possesses extraordinary compositional design, and is imbued with abstract yet familiar notions of time and place.
